Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments, see remarks, filed 7/30/09, with respect to the rejection(s) of claim(s) 1, 17, and 26 under Dabadie or Hellman et al, in view of Tuckey have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of WO 94/28300, as cited in the newly provided IDS.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 94/28300.

Figure 1 shows delivering products of combustion via lines 7-9 from a cylinder in its expansion stroke to the next cylinder in its compression stroke. Typical engines have the air and fuel already mixed. The term "elevated" is relative, and the exhaust is under elevated temperature and pressure relative to the mixture in the compression cylinder.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3741

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 94/28300.

To apply the method of delivering exhaust gas from a cylinder during its expansion stroke to the next firing cylinder, that would be in its compression stroke, to any engine, including an axial engine would have been obvious to one of ordinary skill in the art, so as to reduce emissions.

Allowable Subject Matter

Claims 2-16, 18-25, and 27-34 allowed.
